FAQ

Should I send school certifications (the certification of university enrollment and transcription) by the registration deadline?

Yes, students have to send us their school certifications or degree, transcribed in Italian, before the registration deadline. These are the same documents that non EU students are required to provide, later, to Embassy for the Visa application.

Which kind of school certification I need to provide?

Official degree certification (if in possession) or enrollment certification, exams passed and grades. All these documents have to be transcribed in Italian. Authorized subjects for official translation are listed on the Embassy offices.

Is there priority for whom register sooner?

No, the evaluation will be delivered after the submission deadline that ends on May the 30th. But in case of equal evaluation sooner applications are more appreciated

When can I know if I am selected?

Official communication will take place on the May the 31st and sent via mail. The list of admitted students will be also communicated to the Embassy as an official student's invitation for whom need VISA or other forms of authorizations.

How can I get free admission?

Free admission is based on the evaluation of students' curriculum. 3 positions are reserved to the most qualified students enrolled in the University of Florence. Others, up to six, are available for all the others without any restrictions for their nationality or schools.

Is the conference of the 6th open to public?

Yes. The Conference is an important and fundamental part of the workshop but it is also a public event to let workshopers meet other people interested on this topic. The Conference will be hold at Le Murate Progetti per l'Arte Contemporanea-Comune di Firenze.
